#### How does the RBC lysis buffer work General Lab Techniques

We have been using your lysis buffer (NH4CL) to remove red blood cells from Ficoll-Paque isolation of whole blood. The RBC's are an unwanted contaminant as we are after Neutrophils, Monocytes, Platelets etc. By using this lysis buffer these cells are not activated in any way as to ruin our experiments i.e. degranulation and chemotaxis of Neutraphils.
