Agile project management with Scrum PMI

Abstract. Scrum is one of the agile methodologies designed to guide teams in the iterative and incremental delivery of a product. Often referred to as an agile project management framework, its focus is on the use of an empirical process that allows teams to respond rapidly, efficiently, and effectively to change.

Scrum Methodology and Project Management

In Scrum project management, on the first day of a sprint and during the planning meeting, team members create the sprint backlog. The sprint backlog can be thought of as the team's to-do list for the sprint, whereas a product backlog is a list of features to be built (written in the form of user stories).
