List of Personality Disorders Symptoms Signs of

Personality disorders are a class of psychological conditions that are characterized by a pattern of long term behavior that deviates from societal expectations, and create serious problems in relationships and society. People with personality disorders tend to be inflexible, rigid and manipulative. Although most feel that their behaviors are justified and perfectly fine, they often have a tunnel-vision view of the world and have problems connecting with others in socially acceptable ways.

Personality Disorders AllPsych

Personality Disorders are mental illnesses that share several unique qualities. They contain symptoms that are enduring and play a major role in most, if not all, aspects of the person s life. While many disorders vacillate in terms of symptom presence and intensity, personality disorders typically remain relatively constant.

Personality Disorders List HealthyPlace

Of all the personality disorder types, people with schizoid personality disorder are the ones with more obvious emotional issues. To others, they seem distracted and cold and, similar to people with autism, miss the social cues most of us take for granted. This makes them appear socially inept and fake. Schizoid personality disorder is one of the more rare personality disorder types.
