Great Grub Club A Z of Fruit and Veg

Avocado is often mistaken for a vegetable because we eat it like a salad vegetable, but it is actually a fruit. Avocados are at their best when they are ripe and very easy to prepare. They can simply be cut in half with the stone removed and eaten with a little salad dressing or chopped into a salad. Avocados are a good source of essential fats (the good ones) - one of the few fruits or vegetables that contain fat.
