What is an Annuity Rate ImmediateAnnuities com

Annuity rates for secondary market annuities are often based on the interest rates in effect at the time the original annuity was created. For example, if interest rates were 7% in 2000 and an immediate annuity issued in 2000 were to become available for purchase today, the annuity rate quoted for such an SMA would be 7%, regardless of whether current interest rates are higher or lower.

Top Annuity Interest Rates Current Annuity Rates

Top Annuity Interest Rates Although they become complex, sophisticated investment instruments, annuities still run on common sense: longer and later are better. The longer the insurance company can invest your money before disbursing it, the later in your life you allow the company to keep your money, and the shorter the term of your repayment, the more interest the company will pay.
