### **What is Average Tax Rate definition and meaning**

The total amount of taxes paid by an individual or business divided by taxable income. This rate will vary based on the amount of income received during the taxable period. For example, if Steve paid \$3,000 in taxes on income of \$25,000, his average tax rate would be 12%. Formula: Paid taxes/taxable income = average tax rate.

### **What is the difference between marginal and average tax**

The average tax rate is the total amount of tax divided by total income. For example, if a household has a total income of \$100,000 and pays taxes of \$15,000, the household's average tax rate is 15 percent. The marginal tax rate is the incremental tax paid on incremental income. If a household were to earn an additional \$10,000 in wages on which \$1,530 of payroll tax and \$1,500 of income tax was paid, the household's marginal tax rate would be 30.3 percent.
