## Jane Goodall Biography life family childhood children

Jane Goodall was a pioneering English primatologist (a person who studies primates, which is a group of animals that includes human beings, apes, monkeys, and others). Her methods of studying animals in the wild, which emphasized patient observation over long periods of time of both social groups and individual animals, changed not only how chimpanzees (a kind of ape) as a species are understood, but also how studies of many different kinds of animals are carried out.
