### **Creating a Simple Web Application Using a MySQL Database**

Begin by creating a new Java web project in the IDE: Choose File > New Project (Ctrl-Shift-N; -Shift-N on Mac) from the main menu. Select the Java Web category, then select Web Application. Click Next. The New Project wizard allows you to create an empty web application in a standard IDE project. The standard project uses an IDE-generated Ant build script to compile, deploy, and run the application.
