Impact of Current Financial Crisis On Banking Sector

According to IMF Report April 2009, the impact of Financial Crisis on Banking Sector is very deep and since the start of the crisis, market capitalization of global banks has fallen by more than half from \$3.6 trillion to \$1.6 trillion, while the value of preferred shares and subordinated debt has also fallen sharply, underscoring concerns about the size and quality of capital cushions (See following Figure).

Financial crisis Wikipedia

Some economists argue that financial crises are caused by recessions instead of the other way around, and that even where a financial crisis is the initial shock that sets off a recession, other factors may be more important in prolonging the recession.

This Is Where The Next Financial Crisis Will Come From

It would therefore take a huge leap of faith to say that crises won't continue to be a regular feature of the current financial system that has been in place since the early 1970s. The near exponential growth of finance and its liberalisation since this point has encouraged this trend.
