

DISEASE PARKINSON

RELATED BOOK :

Parkinson's disease Wikipedia

Parkinson's disease is the most common form of parkinsonism and is sometimes called "idiopathic parkinsonism", meaning parkinsonism with no identifiable cause. Identifiable causes of parkinsonism include toxins, infections, side effects of drugs, metabolic derangement, and brain lesions such as strokes.

Parkinson's Disease Early and Later Symptoms 5 Stages

Parkinson's disease is the second most common neurodegenerative disorder and the most common movement disorder. Characteristics of Parkinson's disease are progressive loss of muscle control, which leads to trembling of the limbs and head while at rest, stiffness, slowness, and impaired balance. As symptoms worsen, it may become difficult to walk, talk, and complete simple tasks.
