### **Bodies The Smithsonian Institution's Human Origins Program**

Bodies Adapted to Diverse Climates and Diets. As early humans spread to different environments, they evolved body shapes that helped them survive in hot and cold climates. Changing diets also led to changes in body shape. The bodies of early humans were adapted to very active lifestyles. Their bones were thicker and stronger than ours.

### **What Are Some Of The Most Amazing Signs of Evolution In**

We know that this is the remnant of a lost tail. Between some stages of human embryo genesis, one can actually observe a tail-like structure that is later absorbed. That fact is seriously freaky. Just imagine if we could set up a monitor to show us the stages of embryo formation, we can actually see evolution in motion.
