What to Plant in the Shade Sunset Magazine

For light shade, it's tough to beat *Hydrangea macrophylla*. The shrub is easy to grow, needing little fussing beyond watering, occasional feeding, and light pruning once a year. Yet it pumps out big mophead flower clusters in shades of pink, blue, and white that can reach 10 or more inches across.

Six Plants for Full Shade gardenersworld.com

Found under evergreen trees and hedges, and at the base of north-facing walls, fences and buildings, deep shade can be brightened by plants with different foliage colours, shapes and textures. The shade you have could be dry or damp, depending on where it is. For example, shade at the foot of walls tends to be drier as it's often in a rain shadow.
