Growing Tomatoes and Peppers in Containers Bioadvanced
Container tomatoes and peppers need more fertilizer than in-ground plants. Each time you water, you're washing a little fertilizer from the soil, so you must replace that throughout the growing season. Fertilize plants once every 10 days. Every 3-4 weeks, spray a foliar fertilizer, such as kelp or fish emulsion, on leaves.

Growing Pumpkin in Containers A Complete Guide
While Growing Pumpkin in Containers, its seeds are sown directly into the container. They develop long roots when they germinate, hence they are not suitable for transplanting. In case you can not sow the seed directly in the intended container for some reason, you can sow the seed in a smaller container (use a 1-2 liter container). And then when the plant has developed 3-4 true leaves you can transplant it.
