### **How to Care for an Injured Wild Bird That Cannot Fly wikiHow**

If you find an injured wild bird that cannot fly, make sure it needs your help before you pick it up. Look for blood, broken bones, or open wounds on its wings. If the bird does not have a visible injury, it is best to leave it alone. If you do see an injury, put on gloves and grab a towel that you can use to wrap up the bird. Carefully pick it up with the towel and put it in a ventilated box

### **Injured Bird What to Do Step by Step Instructables com**

You know what, if you know the bird is injured (and you will know this by the fact that it cannot fly) then do not put the bird back in its nest. I almost killed the bird I found by doing this. I put the bird back in its nest and checked on it an hour later and it was almost dead from being so cold. It then also tried to fly again by hopping and almost fell to its death a second time. Do not
