

INDIAN STOCK MARKET VOLATILITY

RELATED BOOK :

NSE National Stock Exchange of India Ltd

The fair value of equity futures is computed using the cost-of carry relationship between the futures and the underlying stock index. However, since India VIX index represents volatility there is no carry between India VIX futures and India VIX. Therefore the fair value of India VIX is derived from the term structure of average variance rate.

Top five factors which are making Indian stock market

Global markets too have become volatile largely on concerns over Grexit, ie Greece's exit from the euro zone, China slowdown and uncertainty over the US interest rate hikes did cause anxiety in the market. The rise in volatility in local markets is, to a large extent, due to a spill-over effect of volatility in global markets, Manpreet Gill of Standard Chartered bank said.
