3 Ways to Make a Macchiato Coffee wikiHow

To make a macchiato coffee, start by brewing a shot of espresso. If you don't have an espresso maker, you can brew a strong pot of coffee instead. Next, pour some cold milk into a tall metal container and use the steam wand to heat the milk. Steam until the milk increases in volume and the container is hot. Once done, pour your steamed milk into your espresso. Then, use a spoon to scoop a dollop of foam on top and serve your macchiato immediately.
