IMF World Economic Outlook WEO October 2014 Legacies

Despite setbacks, an uneven global recovery continues. Largely due to weaker-than-expected global activity in the first half of 2014, the growth forecast for the world economy has been revised downward to 3.3 percent for this year, 0.4 percentage point lower than in the April 2014 World Economic Outlook (WEO). The global growth projection for 2015 was lowered to 3.8 percent.

Our Macroeconomic outlook for 2014 altii Fondsportal

Our Macroeconomic outlook for 2014. We expect a positive turnaround of the world growth cycle this year, driven by developed economies. However, while a conventional recovery is more and more clearly taking shape in the United States, probably also in the UK, the eurozone is only just emerging from recession and Japan will be hit by a fiscal shock (hike in VAT) that will not be totally offset by public demand.

US Economic Outlook for 2018 and Beyond The Balance

The U.S. economic outlook is healthy according to the key economic indicators. The most critical indicator is the gross domestic product, which measures the nation's production output. The GDP growth rate is expected to remain between the 2 percent to 3 percent ideal range. Unemployment is forecast to continue at the natural rate.
