Make Room Make Room by Harry Harrison

Before we had dystopian novels being pushed out like crazy in the 2000's, Make Room, Make Room! came out in 1966 and brought up a bleak and disturbingly believable dystopian future world, one filled with extreme overpopulation, pollution and madness. It's still just as chilling today, in fact the 21st century has made it even more believable than it used to be, making for a frightening but very intriguing book.

Make Room! as the basis for the 1973 film, Soylent Green, which starred Charlton Heston. Although that film has become something of a cult classic, Harrison and other fans have taken issue with its interpretation of the novel. Concerned about audiences losing interest, the creators of the film made cannibalism, not overpopulation, the thematic focus. As a result, fans of the movie and critics alike will want to revisit the story in its original, un-bowdlerized form.
