Market Value of Debt Corporate Finance Institute

The Market Value of Debt refers to the market price investors would be willing to buy a company's debt at, which differs from the book value on the balance sheet. A company's debt doesn't always come in the form of publicly traded bonds, which have a specified market value. Instead, many companies own debt that can be classified as non-traded, such as bank loans.

What is the value of a bond Calculators by CalcXML

Bond values are very sensitive to market interest rates. For example, if you purchased bond with a stated/coupon rate of 10% and market rates had declined to 8% since you purchased the bond, then the value of your 10% bond in a market crediting 8% would be higher. Use this calculator to help determine the value of a bond.
