Research also suggests that the nature-deficit weakens ecological literacy and stewardship of the natural world. These problems are linked more broadly to what health care experts call the epidemic of inactivity, and to a devaluing of independent play. Nonetheless, we believe that society's nature-deficit disorder can be reversed.

Last Child in the Woods Saving Our Children from Nature

Nature deficit disorder is MORE prevalent in adults than in children, and we are passing the disease on to them by rearing them in a way that reflects our chosen values. It is something like parents who smoke and drink while telling their kids not to do the same. Not only is it an ineffective strategy, it is also a disingenuous one.
