Photovoltaic Systems Engineering Second Edition Roger A

In just the last few years, the increase in worldwide photovoltaic (PV) shipments has grown from 15 to 25 percent per year. Grid-connected applications have surpassed stand-alone applications, system components have realized significant improvements, and major efforts are underway to build a quality control infrastructure for PV systems.

Photovoltaic Systems by James P Dunlop Goodreads

This is the second edition, printed in 2010, so some of the information is out of date. Like, no one is still using sun path calculators (it's all about the SunEyes, folks), but you will get I took a class in photovoltaics (that's "solar" to you, bub) and Photovoltaic Systems was a welcome relief to some seriously poor performance on the part of the instructor.
