Mechanisms of Development. Developmental psychology is concerned not only with describing the characteristics of psychological change over time but also seeks to explain the principles and internal workings underlying these changes. Psychologists have attempted to better understand these factors by using models.

### **Developmental Psychology Simply Psychology**

The three goals of developmental psychology are to describe, explain, and to optimize development (Baltes,

Reese, & Lipsitt, 1980). To describe development it is necessary to focus both on typical patterns of change (normative development) and on individual variations in patterns of change (i.e. idiographic development).
