

SHADE PLANTING

RELATED BOOK :

Shade planting annuals bulbs and perennials RHS Gardening

Shade planting: annuals, bulbs and perennials. Gardens shaded by trees and buildings are increasingly common as gardens get smaller. Although north- or east-facing gardens can be cool and shady for much of the year, they can present some creative opportunities with well-chosen shade-tolerant plants.

How to guide Shade planting Henry Street Garden Centre

Shade planting. Gardens shaded by trees and buildings are increasingly common as gardens get smaller. North or east facing gardens can be cold and shady for much of the year. These spaces can be a challenge to plant. To grow healthy plants in shady areas, it is important to identify the degree of shade that a plant will tolerate. Few shrubs will thrive where shade is dense and with dry, unfertile soil.

Planting a Shade Garden DirtOnMyHands com

Shade Gardens. Getting flowers to grow in shady spots can be a challenge. City garden are particularly affected because of buildings, fences and trees. The key to success is choosing the plants that want to be in the shade. Not only is shade a problem under trees, but competition from the tree roots often create a surprisingly dry area.

Planting in shade a simple scheme for a shady Gardening

Most gardens have shade at some time of the day or year; perhaps cast by overhanging trees, or from a wall or fence, or the shadow of the house. Small urban gardens may be in the shade for much of the day, the surrounding buildings only allowing the sun s rays to penetrate when it is directly overhead in summer.
