Short term loan interest rates research and statistics in

What are short term loan interest rates? The APR for short term loans is often much higher than that of normal bank financing. On average, short term loans have an APR of around 400%. The APR typically ranges from about 390% to 780%. For credit cards and personal loans with standard banks, the APR is a lot lower. For example, the national average APR for credit cards is around 15%.

Interest rates Long term interest rates OECD Data

Long-term interest rates are generally averages of daily rates, measured as a percentage. These interest rates are implied by the prices at which the government bonds are traded on financial markets, not the interest rates at which the loans were issued. In all cases, they refer to bonds whose capital repayment is guaranteed by governments. Long-term interest rates are one of the determinants
