Steam Rooms Better Homes Gardens

A steam room is equipped with steam outlet heads powered by a steam generator and is warmed by a heating unit. The generator should be placed near the room in a closet, attic, or, depending on its size, beneath a steam room bench. The type of generator and heater you'll need will be dictated by the size of your space and your heating preferences.

Steam Shower How It Works This Old House

What it is: A moisture-sealed shower enclosure equipped to deliver clouds of steam before, during, or after your shower. How it works: Cold water piped into a steam generator is heated to the boiling point and then sends fresh steam to an aperture in the shower stall.
