Processes in Supply Chain Management Bizfluent

Supply chain management (SCM) is the process of managing the flow of materials, information and services as the materials flow from raw material suppliers to factories and warehouses to end users. The idea behind SCM is to cut costs and improve weak, expensive and inefficient processes in order to realize financial gains. By understanding SCM processes, you can reduce the uncertainty and risks in the supply chain, which will allow your business to reap the benefits of a leaner operation.
