11 Useful Tools for Windows SysAdmins Anturis Blog

This should be part of any system administrator s toolkit to use as a means of auditing machines. You can look here to see if your computer is connecting to IP addresses you do not know, which could be a hacker. It also reveals what software is on your machine that you might want to remove since it is just taking up bandwidth and CPU without providing anything useful to you. Examples of this include Adobe update and many of the other update tools that vendors install without telling you.
