The Geography of Urban Transportation by Susan Hanson

A fantastic compilation of 14 articles covering all aspects of urban transportation, many written by some of the best thinkers in the field. Almost all the articles are filled with relevant and up-to-date information and evenhanded discussions on some of the most contentious issues in modern transport. The book deals with air and water pollution, race and poverty issues, metropolitan planning organizations, GIS technologies, and the land-use impacts of transportation investments.
