### **Difference Between Signal and Noise DifferenceBetween.com**

Signal vs Noise . Signal and noise are two terms used in electrical engineering and communications. Signal is a time or space varying quantity carrying some information, and noise is an unwanted effect on signal which reduces the visibility of that information. Signal to noise (S/N) ratio is a widely used parameter to measure the quality of signals. The higher the S/N ratio, better the signal in quality.

### **The Signal and the Noise Why So Many Predictions Fail**

The Signal and the Noise by Nate Silver is a 2012 Penguin publication. More Information, more problems-This book was recommended by one of the many books related emails I get each day. I can't remember what the particular theme was for its recommendation, although I'm sure it had something to do with how political forecasting data could fail so miserably. Nevertheless, I must have thought it sounded interesting and placed a hold on it at the library.
