Throughout Christopher Clark's book, *The Sleepwalkers: How Europe Went to War in 1914*, the author explores the causative factors behind Europe's descent into the First World War. Rather than focusing on a singular explanation for the war's causes (such as the assassination of Archduke Franz Ferdinand or the destabilization of the Balkans), Clark demonstrates that multiple factors must be recognized and acknowledged to fully comprehend the overall buildup of hostilities across Europe.

In his classic 1928 study, the American historian Sidney Fay wrote that a European and ultimately world war broke out in late July and early August 1914 because in each country political and military leaders did certain things which led to mobilisations and declarations of war, or failed to do certain things which might have prevented them and that responsibility is thus to a greater or lesser degree widely distributed. This, in one sentence, is also Clark's view.
