What is cash flow definition and meaning

The level of cash flow is not necessarily a good measure of performance, and vice versa: high levels of cash flow do not necessarily mean high or even any profit; and high levels of profit do not automatically translate into high or even positive cash flow.

Net Cash Flow Full Explanation Formula Example

Net cash flow is also known as the "change in cash and cash equivalents." It is very important to note that net cash flow is not the same as net income, free cash flow, or EBITDA. You can approximate a company's net cash flow by looking at the period-over-period change in cash on the balance sheet.

Cash Flow Statement Explanation AccountingCoach

The cash flow statement identifies the cash that is flowing in and out of the company. If a company is consistently generating more cash than it is using, the company will be able to increase its dividend, buy back some of its stock, reduce debt, or acquire another company. All of these are perceived to be good for stockholder value.
