WHAT IS SERVICE ORIENTED ARCHITECTURE

RELATED BOOK :

Service oriented architecture Wikipedia

A service-oriented architecture (SOA) is a style of software design where services are provided to the other components by application components, through a communication protocol over a network. The basic principles of service-oriented architecture are independent of vendors, products and technologies.

Service Oriented Architecture SOA Definition

Services. If a service-oriented architecture is to be effective, we need a clear understanding of the term service. A service is a function that is well-defined, self-contained, and does not depend on the context or state of other services. See Service. Connections. The technology of Web Services is the most likely connection technology of service-oriented architectures. The following figure illustrates a basic service-oriented architecture.
