Top 10 Tips for Wireless Home Network Security Lifewire

Wi-Fi signals normally reach to the exterior of a home. A small amount of signal leakage outdoors is not a problem, but the further this signal spreads, the easier it is for others to detect and exploit. Wi-Fi signals often reach through neighboring homes and into streets, for example.

A Basic Primer to Wi Fi Network Security Lifewire

Traditional Wi-Fi network connections go through a router or other wireless access point. Alternatively, Wi-Fi supports a mode called ad-hoc wireless that allows devices to connect directly to each other in a peer to peer fashion. Lacking a central connection point, the security of ad hoc Wi-Fi connections tends to be low. Some experts discourage the use of ad-hoc Wi-Fi networking for this reason.
